

## High Power 35KW Swimming Pool Inverter Heat Pump Side Discharge

Our Product Introduction

### Basic Information

- Place of Origin: China
- Brand Name: Meidibao
- Certification: CE
- Model Number: M-C35ADS
- Minimum Order Quantity: 6 units
- Price: negotiate a price
- Packaging Details: Factory standard packing
- Delivery Time: 30~45days
- Payment Terms: T/T
- Supply Ability: 100 units 30days

### Product Specification

- Type: Inverter Heat Pump
- Power Supply: 3N/380V/60Hz
- Brand Name: MEIDIBAO
- Place Of Origin: China
- Color: White, Dark Grey
- Heat Exchanger: 304 Shell Titanium Tube
- Name: Swimming Pool Inverter Heat Pump
- Highlight: **35KW Swimming Pool Inverter Heat Pump,  
High Power Swimming Pool Inverter Heat Pump,  
High Power 35kw Heat Pump**

## Product Description

### 35KW Swimming Pool Inverter Heat Pump side discharge High power

#### Product Description:

Fixed-frequency air heat pump is through the control of the operation of the compressor to heating or cooling. The power supply frequency can not be changed, and the rotating speed of the constant-frequency air-energy heat pump compressor will basically not change. When the temperature reaches the set temperature, the compressor will stop working, and vice versa, it will start working, rely on continuous start-stop compressor to adjust the temperature. The frequency conversion air energy heat pump is a frequency conversion compressor, which uses the frequency conversion control technology to automatically select the heating, cooling and dehumidifying operation modes according to the ambient temperature, so that the room can quickly reach the required temperature in a short time, and in the low speed, low energy consumption state with a smaller temperature fluctuation, to achieve fast, energy-saving and comfortable temperature control effect.

#### Feature:

1. Inverter compressor
2. DC fan motor
3. Quiet Operation: Produces minimal noise, ensuring a peaceful environment around the pool area.
4. Stable Heating Performance: Maintains a consistent water temperature, providing a comfortable swimming experience.

#### Specification:

Swimming Pool DC Inverter Air Source Heat Pump	
Model:	M-C35ADS
Power Supply:	3N/380V/60Hz
Rated Heating Capacity : KW	35(24.5~52.5)
COP:	4(2.8~6.0)
Rated Heating Capacity : KW	16.2
Input Power: KW	8.75(6.1~13.1)
Max Current: A	30
Water Flow Volume:(L/H)	750
Refrigerant Type:	R410
Refrigerant Volume:	5600g
Inlet/ Outlet unions	DN40
Net Dimensions (L*W*H):	1350*850*1650mm
Net Weight:	350kg
Color	White

#### Advantages:

optimizing energy consumption and reducing electricity costs.

Variable speed operation: It can adjust its output according to the actual heating needs, providing more efficient and smooth operation.

Quiet operation: Inverter heat pumps typically generate less noise compared to non-inverter models, creating a more pleasant environment.

Steady temperature control: It can maintain a consistent water temperature with greater accuracy, ensuring a comfortable swimming experience.

Longer lifespan: The reduced stress on components due to variable speed operation may contribute to a longer lifespan of the heat pump.

Environmentally friendly: It consumes less energy and has lower emissions compared to other heating options.

Compact design: Occupies less space, making it suitable for various pool setups.
