

Energy Saving Commercial Air To Water Heat Pump For Cooling CE Approved

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Meidibao
- Certification: CE
- Model Number: KFXKS-53II-M2(LRS)
- Minimum Order Quantity: 3 units
- Price: negotiate a price
- Packaging Details: Factory standards
- Delivery Time: Specific to the order based on regular products 5 to 7 days. Custom made for 30 days
- Payment Terms: T/T
- Supply Ability: 30 units one day

Product Specification

- Heat Exchanger: Shell In Coil Or Tube In Tube
- Evaporator Color: Gold Or Blue
- Throttling Device: EEV
- Refrigerant: R410A
- Heating: 48.5KW
- Cooling: 32.2KW
- Name: Commercial Air To Water Heat Pump
- Highlight: **Energy Saving Commercial Air To Water Heat Pump**
, Air To Water Heat Pump Heating And Cooling,
Commercial Air To Water Heat Pump For Cooling

Product Description

KFXKS-53II-M2(LRS) air to water heating and cooling heat pump

Product Description:

The Air to Water Heating and Cooling Heat Pump is an innovative and highly efficient solution for all your temperature control needs.

This advanced system operates by extracting heat from the surrounding air and transferring it to water for heating purposes or vice versa for cooling. It offers a sustainable and energy-saving alternative to traditional heating and cooling methods.

Designed with cutting-edge technology, our heat pump ensures reliable performance even in extreme weather conditions. It provides consistent and precise temperature control, allowing you to create a comfortable environment in your home or commercial space.

The installation process is straightforward, and it requires minimal maintenance, reducing your overall costs and hassle. Its compact and sleek design makes it suitable for a wide range of applications without taking up too much space.

In the heating mode, the heat pump efficiently warms the water, which can then be used for underfloor heating, radiator systems, or domestic hot water supply. During the cooling season, it cools the water to provide refreshing and comfortable air conditioning.

With its low noise operation, you can enjoy a peaceful and undisturbed environment. Additionally, it is an eco-friendly choice that helps reduce your carbon footprint and contributes to a greener future.

Invest in our Air to Water Heating and Cooling Heat Pump and experience superior comfort, energy savings, and durability all year round.

Would you like to know more about specific technical specifications or potential applications?

Feature:

1. High efficiency and energy saving
2. Warm and cold
3. Safe operation of hydropower separation
4. Environmental Protection and energy conservation

Specification:

Product	Heating And Cooling Heat Pump
Model	KFXKS-53II-M2(LRS)
Climatic type	Normal
Power supply	380V /50Hz
Rated heating capacity	48.5kW
Rated heating power	13.1kW
Rated cooling capacity	32.2KW
Rated cooling power	14.6kW
Max Rated current	35.5A
Refrigerant / Charge	R410/3600g×2
Rated heating water	55
Rated cooling water	7
Max hot water temp.	60
working temp	0-43
water pipe size	DN40
Noise	≤68dB(A)
Product dimension	1500×760×1120mm
Net weight	320kg
