

60P Commercial Hot Water Air Source Heat Pump with Galvanized Construction and Low-Temperature Operation for Schools and Hotels

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Meidibao
- Certification: CE
- Model Number: DKFXRS-210II-M1
- Minimum Order Quantity: 3 Unit
- Price: negotiate a price
- Packaging Details: Factory standard packing
- Delivery Time: Specific to the order based on regular products 5 to 7 days. Custom made for 30 days
- Payment Terms: T/T
- Supply Ability: 10 Unit/Units per Month

Product Specification

- Name: EVI Heat Pump
- Application: Outdoor Swimming Pool
- Origin: Guangdong Province China
- Working Temp: -35 43
- Color: White, Dark Grey, OEM
- Type: Fixed
- Highlight: **School Air Source Heat Pump,
Mall Air Source Heat Pump,
60P Air Source Heat Pump**

60P Commercial Hot Water Air Source Heat Pump Galvanized For School Hotel Mall Used

The 60P Commercial Hot Water Air Source Heat Pump is engineered for large-scale hot water demands in schools, hotels, malls, and other commercial facilities. Featuring high-quality galvanized construction, this unit delivers exceptional durability, efficiency, and long-term performance in demanding environments.

Key Features

High Heating Capacity: Designed to handle large volumes of hot water with consistent, reliable performance for high-demand facilities

Energy Efficiency: Advanced air source technology delivers exceptional energy savings compared to traditional water heating systems

Durable Galvanized Construction: Corrosion-resistant exterior withstands harsh weather conditions and ensures long-term functionality

Eco-Friendly Technology: Operates with environmentally friendly refrigerants and minimizes carbon emissions

Low-Temperature Operation: Efficient performance in temperatures as low as -25°C, ideal for colder regions

Quiet Operation: Noise-reduction technology maintains peaceful environments for schools, hotels, and malls

Smart Control System: Intuitive controls with remote monitoring and precise temperature adjustment capabilities

Applications

Schools: Reliable hot water for dormitories, kitchens, and gymnasiums

Hotels: Consistent hot water supply for guest rooms, spas, and laundry facilities

Malls: Centralized hot water system for restrooms and food courts

Other Commercial Spaces: Factories, office buildings, and healthcare facilities requiring large-scale water heating

Technical Specifications

| | |
|------------------------------------|---|
| Product | EVI air source heat pump (hot water) unit |
| Model | DKFXRS-210II-M1 |
| Power supply | 380V /50Hz |
| Rated heating capacity (20 /15) | 210kW |
| Rated heating power | 48kW |
| Rated heating capacity (7 /6) | 147KW |
| Rated heating power | 42KW |
| Rated cooling capacity (-12 /-14) | 88KW |
| Rated cooling power | 38kW |
| Max Rated current | 130A |
| Refrigerant / Charge | R410/7500g×4 |
| Water pipe size | DN80 |
| Noise | ≤78dB(A) |

| | |
|-------------------|------------------|
| Product dimension | 2300×1300×2370mm |
| Net weight | 1500kg |

Advantages

Energy efficiency: Significantly reduces energy consumption compared to traditional heating and cooling methods

Versatility: Provides both heating and cooling functions in one unit for year-round flexibility

Environmentally friendly: Produces fewer emissions and offers sustainable operation

Cost savings: Lower energy bills over time due to efficient operation

Quiet operation: Minimal disturbance to the environment

Space-saving: Consolidates heating and cooling into a single unit

Fast response: Quickly adjusts temperature to meet desired settings

Improved indoor air quality: Maintains proper humidity levels and filters air

Long lifespan: Durable construction ensures many years of service with proper maintenance

Easy to control: User-friendly controls for convenient operation and temperature management
