

## Energy-Saving Air Conditioners 8500 Capacity Environmental Protection

### Our Product Introduction

#### Basic Information

- Place of Origin: China
- Brand Name: meidibao
- Certification: CE
- Model Number: M-D08AAH
- Minimum Order Quantity: 6 unit
- Price: 1590-1700USD/SET
- Packaging Details: PLT
- Delivery Time: 30~40days
- Payment Terms: T/T, Western Union
- Supply Ability: 100 sets

#### Product Specification

- Rated Heating Capacity: 8500
- Rated Input Power: 2230
- Rated Current: 10
- Weight: 58
- Dimension: 955\*305\*565
- Highlight: **Wallet And Planet Air Conditioners, 8500 Capacity Air Conditioners**

## Product Description

Double Benefits Are Coming! Energy-Saving Air Conditioners Protect Your Wallet And The Planet. Limited-Time Purchase Available.

### Product Description:

Guangdong Foshan Meidibao Electrical Appliance Co.,Ltd was established in 2005. As a professional manufacturer of heat pumps,it is also a original equipment manufacturer for non-standard customized solutions for Industry Peers.In 2009, the multi-functional heat pump was successfully developed and marketed. After extensive market verification, the product quality has remained stable, and the technology has become increasingly mature.

### Feature:

In commercial scenarios, energy-saving air conditioners demonstrate strong practical value. The modular design is convenient for installation and maintenance, and is suitable for large places such as office buildings and shopping malls. The cluster control function can uniformly manage multiple air conditioners.

Through the background system, it intelligently allocates the load, avoiding the simultaneous high-power operation of the equipment and reducing the peak power consumption pressure. Its highly efficient and energy-saving features can significantly reduce the electricity costs of enterprises. Taking a 1,000-square-meter office area as an example, using energy-saving air conditioners can save more than 50,000 yuan in electricity bills each year.

Meanwhile, stable operational performance reduces equipment failure rates, extends service life, and saves operation and maintenance costs for enterprises. It is an ideal choice for energy conservation and consumption reduction in commercial Spaces.

### Specification:

MODEL	unit	M-D03AAH
Power supply	P/V/HZ	1/230/50
Rated heating capacity	W	8500
Rated Input power	W	2230
Rated current	A	10
Heat water volum	L/H	182
Max input power	W	2900
Max input current	A	14
Refrigerant charging volume	G	R410A/1400
Max exhaust pressure	MPa	4.2
Minium suction presure	MPa	0.05
Rated outlet water temp		55
Max outlet water temp		60
Noise level	db(A)	60
Net Dimension	MM	855*305*565
Net Weight	KG	58

### Advantages:

The intelligent advantages of energy-saving air conditioners bring users a brand-new experience. It supports remote control via a mobile phone APP. Users can turn on the air conditioner in advance on their way home from work and enjoy a comfortable temperature as soon as they get home. With the voice assistant, you can adjust the temperature and wind speed just by speaking, which is convenient and efficient to operate. The intelligent scene mode can automatically switch operation parameters according to different usage scenarios. For example, in sleep mode, it can automatically dim the lights, reduce the wind speed and adjust the temperature curve, ensuring sleep quality while achieving energy conservation. Some high-end models also feature AI learning capabilities, which can analyze users' usage habits, proactively optimize operation strategies, and find the best balance between energy conservation and comfort, making life smarter and more convenient.
