

Commercial-Grade Farming Heat Pump Heater with 15kW Powerful Capacity, R32 Eco-Friendly Refrigerant, and Auto-Defrost Function for Poultry Farms and Greenhouse Cultivation

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Meidibao
- Certification: CE
- Model Number: MDB-22HP
- Minimum Order Quantity: 3 Unit
- Price: negotiate a price
- Packaging Details: Factory standard packing
- Delivery Time: Specific to the order based on regular products 5 to 7 days. Custom made for 30 days
- Payment Terms: T/T
- Supply Ability: 10 Unit/Units per Month

Product Specification

- Name: Meidibao Heat Pump
- Type: Fixed
- Origin: Guangdong Province China
- Working Temp: -7-43
- Dimension: 2000*1100*1960
- Weight: 702
- Highlight: **Auto Defrost Farming Heat Pump, R32 Farming Heat Pump, 15kW Farming Heat Pump**

Product Description

Commercial-Grade Farming Heat Pump Heater 15kW Powerful Capacity R32 Eco-Friendly Refrigerant Auto-Defrost Function For Poultry Farms Greenhouse Cultivation

Product Overview

Foshan Meidibiao Electrical Appliance Co., Ltd, established in 2005, specializes in the research, development and production of heat pumps. With high-quality products and excellent customer service, we have received great praise in markets around the world and have established a global sales network covering regions such as Europe, North America, and South Africa. Whether in terms of technological innovation or service provision, we are committed to exceeding industry standards and establishing long-term partnerships based on reliability and performance.

Key Features

Constant Temperature Control

Equipped with high-precision temperature sensors that monitor the breeding environment in real time to ensure water temperature/room temperature fluctuations do not exceed ± 0.2 , meeting the requirements of fine scenarios such as seedling cultivation.

Multi-Zone Independent Temperature Control

For different functional areas of large-scale breeding farms, supports independent temperature setting for up to 8 zones, meeting the differentiated temperature control requirements of seedling areas, growth periods, and other stages.

Gradual Temperature Rise

Equipped with a "slow temperature rise" mode that avoids stress response caused by sudden temperature changes to farmed organisms, ensuring healthier growth conditions.

Technical Advantages

Equipped with high-precision sensors and an intelligent temperature control system, the breeding heat pump maintains environmental temperature fluctuations within ± 0.2 , providing a stable environment for delicate scenarios such as seedling cultivation. Supports independent temperature control in multiple zones, allowing exclusive temperature settings for different functional areas of the breeding farm to meet the differentiated needs of seedling raising, growth, and other stages. The gradual temperature rise mode effectively reduces stress response in farmed organisms by avoiding sudden temperature changes.
