

Vertical 4-Air Outlet Industrial Dehumidifier AC Unit 6HP 8HP for Factory Warehouse Workshop Cooling, industrial air conditioning

Our Product Introduction

for more products please visit us on airsourc-heatingpump.com

Basic Information

- Place of Origin: China Foshan Meidebao Intelligent Appliance Co., Ltd.
- Brand Name: MEIDIBAO
- Certification: CE
- Model Number: MEIDIBAO-080SL
- Minimum Order Quantity: 1
- Price: For discussion
- Packaging Details: wooden frame or plywood box
- Delivery Time: 30~35days
- Payment Terms: T/T
- Supply Ability: 30set day

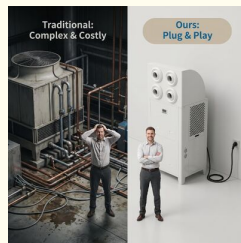

Product Specification

- Power Input: 220
- Input Power: 15.5kw
- Rated Heating Capacity: 3500
- Material: Galvanized Steel With Powder Coating
- Maximum Allowable Current: 1450
- Nominal Input Power: 940
- Airflowrate: 1000 To 10000 CFM
- Powersupply: Three-phase 380V/50Hz Or Customized
- Color: White
- Voltage: 380VAC/50Hz(Varies)
- Control: LCD
- Compressor: Dural
- Operatingtemperaturerange:-10°C To 50°C
- Coolingcapacity: Varies (typically 5 To 50 Tons)

Product Description

1. Core Advantage: Evaporative Cooling Technology, Save 40%~55% Electricity Cost

Adopt advanced evaporative condensation cooling principle, far lower power consumption than traditional cabinet air conditioner. 6HP & 8HP small tonnage perfectly for small factory, seafood workshop, retail warehouse, cutting monthly electric bill sharply, fast investment payback for small & medium factory owners.

2. 4 Adjustable Jet Air Outlets, Long-distance Directional Air Supply

Our Product

Top 4 swirl jet nozzles with adjustable angle, long air delivery distance up to 15-22m, quickly eliminate high-temperature dead corners. Vertical cabinet design occupies tiny floor space, no extra indoor pipeline construction required.

3. All-in-one Integrated Cabinet, Plug & Play Easy Installation

Complete integrated unit without matching cooling tower, circulating pump and complex pipework. Just connect power and tap water to start cooling, cut 80% installation cost and construction cycle, save extra engineering expense for customers.

4. Industrial Heavy-duty Body, Stable Operation Under 45 Extreme High Temp

Thickened galvanized steel cabinet + anti-dust honeycomb heat dissipation net, anti-corrosion & dustproof, adapt harsh working environment with high dust, humidity & waste heat. Even ambient temp hit 45 , cooling capacity keeps steady without high-pressure shutdown.

5. Dual Function: Cooling + Whole-space Ventilation & Air Renewal

While lowering indoor temperature, continuously exhaust turbid, odorous air inside the plant, improve workshop air quality, ideal for food processing, plastic workshop, poultry farm with heavy peculiar smell.

6. Intelligent Digital Control Panel, Easy Operation & Low Maintenance

Built-in digital display control screen, set target temp freely automatically constant temperature operation. Simple daily maintenance: only regular filter cleaning, no frequent refrigerant filling needed, ultra-low after-service cost.

7. Compact Vertical Design, Flexible Layout for Narrow Space

Vertical upright cabinet structure, save ground area, can be placed along wall, passage or production line; multiple units can be arranged side by side for zoning cooling of irregular small workshops.

Core Features

Save 45% Energy

20m Long Airflow

Zero Installation

Air Purifying

20m Directional Airflow

4 adjustable nozzles for targeted cooling

Smart LCD Control

One-touch temp setting,
auto start-stop

**Traditional:
Complex & Costly**

**Ours:
Plug & Play**

Stable at 45°C / 113°F

Anti-dust mesh for harsh environments
